CZ 600+ ERGO DRIVEN HUNT

A NEW MODERN, CENTERFIRE HUNTING RIFLE

Feedback from customers, along with experience gained in production of the CZ 600, was then put to good use for the improved CZ 600+ model. The first flagship in this series is the CZ 600+ ERGO DRIVEN HUNT model. A user replaceable barrel, new magazine, and extended weaver rail are just a few of the improvements that come as standard on the new CZ 600+ ERGO DRIVEN HUNT. Let's take a closer look.

- + ERGONOMY ON TOP
- + USER REPLACEABLE BARREL
- + SAFETY EXACTLY WHERE YOU NEED IT
- + FINE-TUNE TRIGGER PULL WEIGHT
- + PRECISION THAT'S ALWAYS ON POINT
- + CONTROLLED FEEDING

MAIN FEATURES

COLD HAMMER FORGED BARRELS WITH A LIFETIME WARRANTY

If something is firmly rooted in the DNA of CZ products, it is our highly durable and accurate cold hammer forged barrels. We have utilized cold hammer forging technology for many decades, and due to the experience gained over the years, we are able to manufacture the highest quality barrels. Proof that we stand by this claim is the lifetime warranty provided against precision and manufacturing defects on the barrel that comes with your CZ 600+ ERGO DRIVEN HUNT. Just register your rifle on the customer club website and start reaping the benefits.

USER REPLACEABLE BARREL

The cleverly designed barrel mounting system on the CZ 600+ ERGO DRIVEN HUNT receiver allows for safe and easy replacement by users. Just consult the instruction manual, study the procedure, and make sure that the appropriate barrel, receiver, and stock can be combined. And off you go! This feature is greatly appreciated by shooters who prefer different calibers for different purposes. It is therefore not a problem to have one caliber for hunting, another for target shooting, and so on.

PRECISION THAT'S ALWAYS ON POINT

Accuracy is key when it comes to hunting rifles. Not only does it determine the success rate of a given shot, but a precise shot also ensures that the game does not suffer. That's why the CZ 600+ ERGO DRIVEN HUNT offers guaranteed, factory-tested sub-MOA at 100 m (three-shot groups using match-grade factory ammunition).

ERGONOMY ON TOP

The thumbhole stock is made from extremely durable polymer, which is complemented by components made of soft TPU material. The rubber grip inserts have been highlighted in orange, which contribute to safety during hunts thanks to their high contrast.

However, the aforementioned durability of the stock material is only one of the many features of the CZ 600+ ERGO DRIVEN HUNT stock. Thanks to a sophisticated shape, it is also very comfortable, regardless of the physical proportions of the shooter. A further advantage is the stock's light weight, which makes it a versatile choice, regardless of how and where you use it.

SAFETY EXACTLY WHERE YOU NEED IT

The patented vertical safety, which is located on the tang of the stock, is easy to operate with the thumb

of the shooting hand and is virtually silent. Nothing is more frustrating than to scare game away at the last second by disengaging the safety.

Among its undeniable advantages belongs also a very natural motion of the safety, which eliminates any unwanted movement of the weapon. Thanks to this, you can disengage the safety just before the shot is fired and a hit is guaranteed! Engaging the safety locks the bolt, which can be operated or removed from the gun by pressing the disassembly lever. This eliminates the need to disengage the safety or manipulate the trigger before disassembly. Safety first!

CONTROLLED FEEDING

The patented feeding mechanism that allows for 100% controlled feeding is carried over from previous models in the CZ 600 series. Its exceptionally smooth operation, combined with a short extractor, ensures reliable feeding and control regardless of environmental conditions. It's just you and your rifle, in perfect harmony.

FINE-TUNE TRIGGER PULL WEIGHT

The most important factor for any hunt, as well as for all shooting disciplines, is safety. We realize that setting trigger pull weight is based on a wide range of situations encountered by hunters. A higher pull weight is more appropriate for driven hunt and instinctive shooting, while a lower pull weight is more appropriate for static, aimed shooting. The CZ 600+ ERGO DRIVEN HUNT makes it easy to choose from four preset trigger weights. You just need the appropriate Allen key handy and use it to simply turn the adjustment screw to one of the 4 positions, allowing you to set pull weight exactly as you require.

FLUTED BOLT

Many say practicality and aesthetics should go hand in hand. Although one can live without the other, it's just not the same. The fluting on the CZ 600+ ERGO DRIVEN HUNT is not just a striking aesthetic touch, but a very interesting feature. The fluting contributes to smooth and reliable operation, even when faced with dirt and grime. No matter how hard nature tries, the CZ 600+ ERGO DRIVEN HUNT is unstoppable!

A FINISH THAT LASTS

The biggest enemy of metal surfaces is corrosion. Providing effective protection is very difficult, especially if you need to maintain high reliability and durability. For many years, CZ has applied an in-house method of deep nitriding to the metal surfaces of its firearms called BoBox. Since this

finish has proven to be a very successful method of protection, it has found its way to the new CZ 600+ ERGO DRIVEN HUNT. No matter what you encounter in the wild - mud, sand, rain, snow, or anything else - BoBox will stand strong against it. What about you?

NEW MAGAZINE

Another improvement is the magazine, whose insertion into the rifle has been radically simplified. No matter what method you use to insert the magazine into your gun, it will always click into place and function reliably as either a fixed magazine, allowing for top loading, or as a standard removable magazine. The choice is yours. The CZ 600+ ERGO DRIVEN HUNT model has a standard capacity of 10 rounds.

EXTENDED WEAVER RAIL

An additional groove had been added to the rear of the duralumin receiver for mounting optics. As a result, it is now possible to attach larger scope rings on the rifle, which will be especially appreciated by shooters who use bigger optics or night vision scopes.

RADIAL COMPENSATOR

As the CZ 600+ ERGO DRIVEN HUNT is a relatively light firearm, we have also focused on making the recoil more comfortable. Helping to tame recoil is a radial compensator, which is attached to the muzzle via an M15x1 thread. As a result, you don't have to worry about muzzle flip or an unpleasant „kick“ in the shoulder.

TRIGATTI SLING SWIVELS AND A HIGH-QUALITY STRAP

In addition to standard accessories, the CZ 600+ ERGO DRIVEN HUNT comes with a high-quality nylon strap that can be attached to the rifle with hunt-proven Trigatti sling swivels. Just unpack your rifle, mount and zero your optics and head straight out to the hunt.

AT HOME ON THE HUNT

To wrap up, the CZ 600+ ERGO DRIVEN HUNT is a precision-engineered rifle tailored for hunters who seek both versatility and performance. With features like user-friendly barrel interchangeability, a lightweight ergonomic stock, and a cold-forged barrel backed by a lifetime warranty, it's built for reliability in the toughest conditions. Don't miss out on experiencing this exceptional hunting rifle—explore the CZ 600+ ERGO DRIVEN HUNT today and elevate your hunting experience to the next level!
